EDUCATION

B.E in Artificial Intelligence and machine learning, SPPU University
CGPA:7.62/10

Dec 2021 - Aug 2025

TECHNICAL SKILLS

Programming	C++, Java, Python, JavaScript, SQL
Backend	REST APIs, MySQL, Redis,
Frameworks/tools	Flask,Node.js, React, React.js., Docker, Git, Selenium
Specialized Knowledge	Distributed Systems, Relational Databases, Machine Learning Pipelines

EXPERIENCE

Software Development Engineer Intern

Nov 2025 - April 2026

Tasks Labs

Bengaluru, India

- Achieved a 15% reduction in system crashes for our app using backend development, and problem-solving .
- Led the testing of new software features making sure the app has no bugs before launch.
- Developed backend code features that loaded data quickly, fixed old errors using JavaScript, API tools.

AIML Intern

Jul 2025 - Oct 2025

Internpe

Remote

- Worked on LLM (Large Language Model) projects to learn how smart AI chatbots understand text.
- Programmed a Fraud Detection System using Machine Learning algorithms to spot safe vs. unsafe data.
- Practiced core Data Science skills like training models and cleaning data using Python libraries.

PROJECTS

Project Management System

Live GitHub

Built an **AI-powered engineering collaboration platform** using **Next.js**, **FastAPI**, **PostgreSQL**, **Redis**, and **Socket.IO**. Implemented **Kanban boards**, **AI project assistant**, and **real-time collaboration**, reducing **project planning time by 35%** and **manual meeting documentation by 80%** during internal testing.

Safety.NET

Live GitHub

Built **Safety Net**, a real-time safety analytics app utilizing a **FastAPI** backend and **ReactJS** with **Tailwind CSS** to map regional crime rates. Integrated location tracking and predictive algorithms within a **5km** radius, reducing emergency navigation delays by **40%**.

Pricing Engine

Live GitHub

Developed an automated pricing engine using **Python**, **Pandas**, and **Streamlit** to dynamically adjust rates based on inventory levels, securing a **20% minimum profit margin** and **saving hours of manual tracking weekly**.

ACHIEVEMENT

- **Project Finalist:** Recognized for innovation in Development at college project Competition for building- **Advanced composite platform for workflow automation**.
- I finished three big AI and cloud courses called "**AWS Course CLI Certificate**", "**Datascience,DL&NLP**", and "**Machine Learning Bootcamp**" studying for over 140 hours. I used Python , AI models, and AWS terminal commands to build smart projects, which cut my data work time by 40% and made my predictions over 60% accurate.
